

TFF, SEC, AND BEYOND:

ESTABLISH YOUR ENTIRE
BIOPROCESSING WORKFLOW
WITH **qEV ISOLATION**

A comprehensive and versatile approach
to scaling EV isolation, from fundamental
R&D to manufacturing EV-based products in
GMP-compliant environments.

Enquire now about qEV TFF systems

Concentrate your sample prior to EV isolation, and concentrate your purified qEV isolate if required. New beta units available soon, in standard models and for GMP-compliant environments.

ENQUIRE NOW

Scale your EV isolation workflow with the qEV Zenco

Your automated chromatography system designed to purify samples from 2-400 mL using qEV columns.

Refine your process with yield and efficiency assessments

Gain high-resolution particle characterisation insights with the Exoid's tunable resistive pulse sensing technology.

Benchtop qEV tangential flow filtration systems to complement your qEV Isolation workflow

Modular design offers flexibility

In-built dedicated qEV isolation workflow

Available in GMP-compliant and standard models

Access the **qEV TFF**
spec sheet
